

Blade Runner[®] Sleeve

Blade Runner[®] Sleeve is an extremely comfortable sleeve made with Dyneema[®] and glass fibre, offering outstanding cut and tear resistance. This cut resistant seamless sleeve made with Dyneema[®] Technology offers the lightest and most comfortable solution for cut resistance. The addition of glass fibre significantly improves the cut resistant performance and durability without compromising on comfort. The yarn's special coating provides a level of comfort not previously associated with level 5 cut resistance. Blade Runner[®] Stretch has been designed to be loose fitting for comfort and is kept secure by an elasticated knit wrist and an adjustable VELCRO[®] strap at the top end. The excellent protective qualities of this sleeve make it an ideal companion to any cut resistant glove when additional protection to the arm is required.

Typically used for:

- Automotive Manufacturing
- Aerospace • Steel Industry
- Cable & Couplings • Can & Bottle
- Press Works • Glass Handling
- Security Forces • Glazing • Construction
